

**TAZ, 17,
NEW YORK**

Counting on Katherine is an exciting and beautifully illustrated book about a pioneering mathematician.

Banning this book will deprive young readers of access to a powerful role model who demonstrates that one can overcome obstacles and achieve history with effort, persistence, and intellect. Katherine's tale inspires youth, particularly females and students of color, to pursue their dreams without fear, and it serves as a reminder that everyone deserves to be included in the narrative of progress.
